

Polar Thermal Products Ltd

Specification : 250ml Vaccine 'Gel Pack' Wallet

A high performance, high quality, durable 250ml capacity thermal pouch for the carrying of vaccines and medicals that require to be temperature controlled. Comes **supplied with gel packs stitched into the linings** to extend thermal performance or if being opened and closed regularly. Designed to be placed in fridge/freezer for 'chill down'.

Product Code: **AERO/05/0024**

Specification: **001/07**

Often used by district medical staff carrying out vaccinations within the community, or to courier pharmaceutical, medical, blood product or perishable samples between locations.

Able to keep products within between 2 and 8°C for several hours depending on use and whether gel packs are used.

All products are water proof, have rot proof stitching and are anti fungal.

Guarentee

All Polartherm products carry a **two year guarentee** subject to normal wear and tear

Specifications

<i>Weight empty</i>	0.9070 kgs
<i>External surface material</i>	Cotton coated PVC
<i>Internal lining material</i>	Cotton coated PVC
<i>Insulation material</i>	Patented Polartherm material
<i>Insulation thickness</i>	45mm
<i>External dimensions</i>	width: 400mm height: 150mm depth: 270mm
<i>Internal dimensions</i>	width: 350mm height: 100mm depth: 220mm
<i>Lid type and fixings</i>	Zip
<i>Number of icepacks supplied</i>	Two ice packs are stitched into the base and lid.
<i>Cold life without opening</i>	17 hours if unopened.
<i>Thermal Conductance (W/m².K)</i>	1.01 ± 0.1
<i>Thermal Conductivity (W/m.K)</i>	0.05 ± 0.005

Made from Polartherm™ - a unique triple layer insulation developed from the NASA space programme. It comprises an inner reflective layer, a hollow fill fibre filler and a robust woven PVC (optionally fireproof) outer. It is lightweight, robust, hygienic, easily cleaned and complies with UK and US food safety requirements.
